ORDNANCE PAMPHLET 0 (TWENTY-THIRD REVISION)

INDEX OF ORDNANCE PUBLICATIONS

1. Ordnance Pamphlet 0 (Twenty-third Revision) is a listing of the following types of UNCLASSIFIED, RESTRICTED, and CONFIDENTIAL Ordnance publications stocked for issue by the Bureau of Ordnance:

Ordnance Pamphlets
Ordnance Data
Ordnance Technical Instructions
Ordnance Handling Instructions
Ordnance Modification Instructions
Ordnance Charts
War Department Publications

(NOTE: An index of Ordnance Circular Letters may be found in NAVORD OCL's CE1-45 and CE1a-45, "Ordnance Circular Letters—Cumulative Editions.")

2. Part 1 comprises a numerical listing. Each publication is again listed in Part 2, a subject index, by type of equipment. Part 3 contains a check list of Ordnance Pamphlets, Ordnance Data, and War Department publications most frequently requested and required by ships armed with 5-inch or smaller caliber guns.

3. Methods of distributing and instructions for ordering Ordnance publications are outlined in the introduction to this index.

4. This publication supersedes Ordnance Pamphlet 0 (Twenty-second Revision), which should be destroyed.

5. This pamphlet is RESTRICTED and shall be safeguarded in accordance with the security provisions of U. S. Navy Regulations, 1920, Article 76.

INTRODUCTION

DISTRIBUTION OF ORDNANCE PUBLICATIONS

Initial Distribution

All new Ordnance publications, and publications indicated as under preparation or revision in this index, will be automatically distributed to interested activities without request. Publications are initially distributed to Commanding Officers of Naval activities in accordance with the Standard Navy Distribution List.

How Initial Distributions Are Made

Information copies of Ordnance publications concerning specific Ordnance equipment are forwarded without request to the following:

(1) To all Naval activities to which specific Ordnance equipment is assigned.

(2) To activities which may be called upon to stow, transport, overhaul, repair, or otherwise handle specific Ordnance equipment.

(3) To activities which train personnel in the operation, maintenance, repair, or handling of Ordnance equipment.

(4) To higher echelons to which the above mentioned Naval activities are directly responsible.

Redistribution by Addressee

It is the responsibility of the Commanding Officer of each activity to insure distribution of Ordnance instructions to the officers and enlisted personnel working with applicable equipment, or otherwise responsible. It is also the responsibility of the Commanding Officer to distribute to subordinate activities under the command which are not listed in the Standard Navy Distribution List.

Reference Library

It is recommended that as Ordnance publications are received on initial distribution, a reference library or central file be made accessible to the officers and enlisted personnel whose work is concerned with Ordnance.

Number of Copies Forwarded for Redistribution and File

At the present time, this Bureau automatically forwards two (2) copies of applicable Ordnance pub-

lications to Naval activities included on the Standard Navy Distribution List unless it is otherwise indicated in the distribution list printed in each publication. Distribution to larger Naval activities, such as Navy Yards, has been established at five (5) copies or multiples of five (5) copies. Upon request, this Bureau will increase the number of copies now forwarded in order to meet the specified requirements of the requesting activity.

Commissioning Allowances

Commissioning Allowances of applicable Ordnance publications are automatically forwarded as indicated below. Each activity will receive all applicable publications on initial distribution.

To Ships. Publications for Naval vessels (LCIL and larger) are forwarded to the Prospective Commanding Officer in care of the Builder's Yard or Commissioning Detail. Shipment is made from 1½ to 3 months in advance of the commissioning date, depending on the type of ship.

To Aviation Activities at the times indicated below:

Each newly commissioned Aviation Squadron or Service Unit is responsible for securing its own commissioning allowance of Ordnance publications from the nearest Aviation Ordnance Publications Distribution Point in accordance with instructions placed in its commissioning jacket. These instructions will specify that the commissioning allowance be obtained by submitting NAVORD FORM 1 (ORDNANCE PUBLICATIONS AND FORMS REQUISITION) to the nearest Aviation Ordnance Publications Distribution Point listed thereon, requesting the following:

- (a) NAVORD LIST 20870 (Aviation Ordnance Allowances)
- (b) All applicable publications listed on NAVORD FORM 1412A (Commissioning Allowance of Ordnance Publications for Aviation Activities)
- (c) All applicable Aviation Ordnance publications issued subsequent to date of NAVORD FORM 1412A

Air Stations and Air Facilities will be forwarded their commissioning allowances automatically at the date of commissioning.

Advanced Base Aviation Functional Components at their initial assembly points. Air Ordnance Departments of Aircraft Carriers are designated to receive applicable publications from the commissioning Allowance shipped the PCO of the CVB, CV, CVE, or CVL 2½ months before the commissioning date.

To Advanced Base Functional "J" Components. Publications are forwarded by Bureau of Ordnance shipment order to the initial assembly point of each component. Subsequent initial distributions of Ordnance publications applicable to these activities are made to all *LIONS*, *CUBS*, *ACORNS* and *ARGUS UNITS*.

To Other Naval Activities Commissioning Allowances of Ordnance publications are individually determined for major shore establishments requiring Ordnance information.

Commissioning Allowance List (NAVORD FORM 1412)

This list enumerates all current Ordnance publications applicable to the Ordnance equipment assigned a specific type of activity and accompanies the shipment of the Commissioning Allowance. Ordnance publications should be checked against the allowance list provided and not against an allowance list prepared for any other ship or activity.

HOW TO ORDER ADDITIONAL ORDNANCE PUBLICATIONS

Nonregistered Publications. Requests for non-registered Ordnance publications not automatically received or for additional copies of publications received on initial distribution, should be submitted on NAVORD FORM 1 (Rev. 8/45) by the Commanding Officer to the nearest Ordnance Publications Distribution Center: Washington, D. C.; Mare Island, Calif.; Pearl Harbor, T. H. Distribution Center mailing addresses may be obtained from the Standard Navy Distribution List, or from the reverse side of NAVORD FORM 1. Copies of NAVORD FORM 1 are included in each copy of OP 0 (23rd Rev.), and additional copies may be obtained from the nearest Ordnance Publications Distribution Center.

Aviation Ordnance Publications. The reverse side of NAVORD FORM 1 also lists aviation activities serving as distribution points for Avia-

tion Ordnance publications, to which requests made out on this form may be addressed.

War Department Publications. War Department publications whenever applicable are initially distributed and furnished on Commissioning Allowances to Naval activities in the same manner as Bureau of Ordnance publications. Requests for War Department publications not included in this Index of Ordnance Publications shall be made to the Bureau of Ordnance accompanied by a notation of the Army equipment in Navy use to which the requested War Department publication applies.

Registered Publications. Registered Ordnance publications are distributed by the Chief of Naval Operations (DNC), Registered Publication Section, and may be obtained in accordance with instructions currently set forth by the Chief of Naval Operations in Letter 44-89 dated 15 January 1944, reprinted in Navy Department Bulletin of All Ships and Stations Letters January to June 1944.

NAVORD ORDALTS, Requests for NAVORD ORDALTS should be directed to the nearest Naval Shipyard; or to the Bureau of Ordnance Publications Distribution Center at the U. S. Naval Gun Factory, Washington 25, D. C.

Caution. It is essential that the correct abbreviation for each publication as listed in the applicable index be used to avoid misunderstanding and thus to speed the handling of orders.

DISPOSITION OF EXCESS COPIES OF NON-REGISTERED ORDNANCE PUBLICATIONS

Decommissioned activities or other activities with excess copies of Ordnance publications shall be guided by the following in their disposition:

Ordnance publications which should be returned:

Bureau of Ordnance Manual

Ordnance Pamphlets (OPs) hard covers

Ordnance Pamphlets (OPs) on major caliber gun turret assemblies

Unclassified publications

NAVORD CHARTS which may be rolled

War Department Technical Manuals on small arms

When in condition suitable for reissue, the above Ordnance publications should be returned to the nearest Ordnance Publications Center or Subcenters listed below:

The Superintendent
U. S. Naval Gun Factory
Washington 25, D. C.
(Attention: Ordnance Publications
Distribution Center)

Ordnance Publications Subcenter at
Pearl Harbor, T. H.
Mare Island, California

Ordnance Publications, drawings and forms which should be destroyed in accordance with U. S. Navy Regulations, 1920:

The handling and stowage costs involved in returning certain printed matter are disproportionate to the possible savings.

1. Nonregistered Ordnance publications classified as **CONFIDENTIAL**, except those indicated above, should be burned.

2. Nonregistered Ordnance publications classified as **RESTRICTED**, except those indicated above, should be shredded and salvaged in accordance with the present practice.

3. Ordnance drawings classified as **CONFIDENTIAL** should be burned; **RESTRICTED** or unclassified drawings should be shredded and salvaged.

4. Excess Ordnance forms should be shredded and salvaged.

DISPOSITION OF OBSOLETE NONREGISTERED ORDNANCE PUBLICATIONS

All nonregistered publications, when declared obsolete by Bureau of Ordnance letters to All Ships and Stations published in the Navy Depart-

ment Semimonthly Bulletin (Restricted), should be destroyed in accordance with U. S. Navy Regulations, 1920.

HANDLING OF REGISTERED ORDNANCE PUBLICATIONS

Registered Ordnance publications (ORDs) shall be handled in accordance with RPS 4 and U. S. Navy Regulations, 1920, Article 76.

SUPPLEMENTARY LISTINGS OF ORDNANCE PUBLICATIONS

The following sources are available for periodic listing of Ordnance publications:

Navy Department Semimonthly Bulletin. Bureau of Ordnance "All Ships and Stations" letters list new and/or revised Ordnance publications as soon as they are initially distributed. These Bulletins also contain Bureau of Ordnance letters issued when Ordnance publications are declared obsolete.

NAVAER 00-500. This Bureau of Aeronautics publication also lists current Aviation Ordnance publications which should be ordered from Ordnance Publications Distribution Centers as outlined in this introduction.

INTRODUCTION

Part 3 contains a check-off list, to provide in convenient form a quick means of identifying the Ordnance Pamphlets, Ordnance Data, and Army publications most frequently requested and required by ships armed with 5-inch or smaller caliber guns. These publications are included in the commissioning allowance lists of Ordnance publications for applicable vessels, and are automatically furnished on commissioning. Additional copies of the publications may be obtained as outlined in the Introduction to OP 0 (23rd Rev.).

Publications applicable to Guns and Mounts are listed by Gun Caliber. Fire Control, Torpedo, Depth Charge, and Rocket publications are listed by type of equipment. Also listed are basic OPs and NAVORD ODs applicable to all such vessels. Aviation Ordnance and Submarine Ordnance publications are not included.

For a complete subject index of all Bureau of Ordnance publications by type of equipment, Part 2 should be consulted.
